of Larry Nedrow and is Human Services Division now and I am wondering if that is even proper language. That would be the question. That has happened since we adjourned last session and I would think maybe it would be a good idea to check and see if this would still be proper language because, I don't know, there may not even be a superintendent of it anymore. They might call it something else. It might just be a Department in Welfare. I think we should check on that before you advance it and get these questions answered and maybe we could answer Senator Murphy's questions at the same time. Would you be agreeable to that?

SENATOR KENNEDY: Yes, and as far as the total amount, the question asked as to how many would be affected, that would be a very difficult thing. The thing would be that if someone does come into a situation of an insurance settlement or something of a sum, there is no way or no provisions so they are trying to cover something that is not there now but I think the wording there of the title might be a concern as, do you have an administrator or do you have..

SENATOR BARNETT: I think they are trying to give the young people a little more money to get out and get started on and I think that is all right. I think that is commendable but I don't even know if that would be a legal law now the way it is stated and I think you should check into that.

SENATOR KENNEDY: We probably should go back to Mr. Warns-holz, the attorney for the Welfare, and ask that. I would, at this time, then, if there is no objection, to let us make that inquiry because there has been a change and I appreciate Senator Barnett's thoughts on that. There has been a change really which might make a change in the wording in this bill. So I would ask, if there is no objections, to bracket the bill until we have an answer from the attorney on this, if there is no objections.
